

Lock Collars

SolarMat lock collars solve the problem of attaching the solar tubing to the **SolarMat** manifolds.

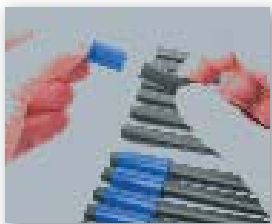

SolarMat lock collars make it easier to attach the solar tubing to the roof manifolds for the life of the solar system.

The flexibility of our **SolarMat** lock collars enables them to be used for a variety of system types making it also ideal for general pool solar maintenance purposes.

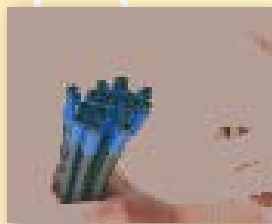

SolarMat lock collars are the most effective solar absorber locking system available.

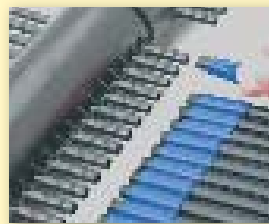

SolarMat lock collars are firm yet expandable – not rigid like plastic type collars.
SolarMat lock collars makes installation a quick 4 step process

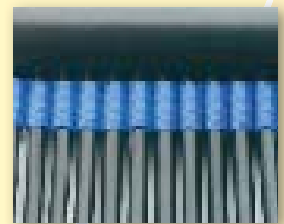

STEP 1
Slip the SolarMat lock collar on to tube

STEP 2
Lubricate the tubes with silicone spray

STEP 3
Pinch the SolarMat lock collar and slide it onto the barb

STEP 4
Neat and tidy installation that lasts the life of the system
