

Vac Relief Technology

SolarMat Vacuum relief technology is the Swimming Pool Solar Industries leading Vacuum relief valve. Its unique design eliminates the problems of old style Vacuum relief valves. Designed and manufactured in Australia the SolarMat Vacuum Relief Valve easily meets the requirements of the harsh Australian climate.

Features and Benefits

- Tough LURAN S construction means it will withstand extreme weather as well as high positive and negative internal pressures
- Superior valve protection using double air flow filter technology with a 316 stainless steel mesh
- Quick and easy servicing
- The high performance umbrella check valve made by specialist U.S. ELASTOMERIC manufacturer which provides low vacuum relief pressure and quick drain down function

Mean cracking pressure (AIR) • 6.8mbar (0.098 p.s.i)
Test back pressure (WATER) • 10 bar (145 p.s.i)

SolarMat Swimming Pool Solar Systems have been designed and engineered for the tough conditions of Australia. All components of our SolarMat Swimming Pool Solar Systems are Australian made and are of the highest quality available in the market.
